

Félix GARCÍA-PEREIRA

PROFILE

Passionate **climatologist** with formation in meteorology and climatology sciences and expertise in climate modeling and dynamics. My main field of research is soil climatology, with a special focus on the representation of subsurface thermodynamics and hydrology in climate models, and the understanding of these processes from observational data. Proficient in Shell, Fortran, and Matlab programming, I have a wide experience in running (MPI-ESM model) and analysing climate simulations.

PERSONAL INFORMATION

Date of birth: **1996-09-16**
Citizenship: **Spanish**
Family: **Single without children**
Languages: **Spanish** (native),
English (C1), **French** (B1)

SKILLS

- Data science, big data
- Climate modeling (MPI-ESM)
- Matlab, Fortran, Shell, Python
- MS Word, Excel, PowerPoint

EXPERIENCE

SHORT RESEARCH STAY at *Max-Planck-Institute for Meteorology (MPI-M), Hamburg, Germany.* **2023/09-2023/12**

PH.D. CANDIDATE IN PHYSICS at *Universidad Complutense de Madrid (UCM), Madrid, Spain.* **2020/10-present**

◇ Contract PRE2019-090694 of the Spanish Ministry of Science (MICINN).

RESEARCH ASSISTANT at *Guadarrama Monitoring Network (GuMNet), Universidad Complutense de Madrid - Campus de Excelencia Internacional (UCM-CEI), Madrid, Spain.* **2019/06-2020/09**

EDUCATION

PH.D. CANDIDATE IN PHYSICS. Physics Faculty. *Complutense University of Madrid (UCM), Madrid, Spain.* **2020/10-present**

◇ Thesis title: *Effects of an increased realism in the land surface model in global climate simulations of the last 2000 years.*

MASTER IN METEOROLOGY AND GEOPHYSICS. Physics Faculty. *Complutense University of Madrid (UCM), Madrid, Spain.* **2018/09-2019/09**

◇ Thesis title: *Analysis of turbulent scales in two nearby locations of a mountainous area.*

BACHELOR OF SCIENCE IN AEROSPACE ENGINEERING. School of Technical Aeronautical Engineering. *Technical University of Madrid (UPM), Madrid, Spain.* **2014/09-2018/06**

◇ Thesis title: *Experimental approach to deflagration to detonation transition (DDT) in hydrogen-air mixtures in a channel with obstacles.*
